SUMMARY

A passionate and motivated developer well versed in Web Development and speaking to clients.

Excited to learn cutting-edge design principles and build long lasting applications.

EXPERIENCE

Front End Web Developer, Worldwide Interactive Services
Orlando, FL — August 2015 - Current

I was hired to maintain and implement new features to Worldwide's current consumer facing Mobile App portal utilizing PhoneGap and AngularJS. During the course of my employment I also worked extensively on their internet portal using C# and ASP.NET.

Accomplishments

- Collaborated daily with the backend team to ensure changes were made effective quickly.
- Responsible for maintaining, optimizing, and implementing key features to the Mobile Banking App.
- Made optimization a priority by cutting code bloat, avoiding watchers, and using Chrome DevTools.
- Learned new pre-processors CoffeeScript and HAML, as well as C# and ASP.NET during the project.
-

SKILLS

- HTML5, CSS3, JavaScript, C#, PHP
- Angular, jQuery, ASP.NET, CoffeeScript, HAML, SASS, Bootstrap
- Git, Sublime Text, Visual Studio, Chrome DevTools, JSHint

PROJECTS

iMDB API Search
- Vanilla JavaScript web app that applies to a UI to request data.
- Extensive use of AJAX calls to iMDB.com.

Last Five - League of Legends API
- Created an application using the Riot games official API to display player results from their last five ranked games.
- Made possible by utilizing external APIs, interpreting JSON and rendering the data with jQuery.

Journey - Game using Canvas
- Created a collectible game utilizing Canvas for the first time, using Canvas to generate graphics.
